

FP Range Foot Operated Eyelet Machines

- Sail & Grommet Eyelets
- Self-piercing Eyelets
- Stationery Eyelets
- Universal Eyelets
- Pop Fasteners
- Press studs

This value for money machine helps take the strain out of eyeleting, the foot operated mechanism leaves both hands free to position the eyelet and hold the work piece.

- Easy setup and operation
- Heavy duty construction
- Supplied with full operating instructions

For specialist applications the machines can be customised with stops and other fixtures to accurately hold the work piece in place.

Operate from behind	N	N	Y
Weight*	45kgs		
Total Height*	1260mm		
Working Height*	950mm		
Bench Height*	860mm		
Bench Width*	500mm		
Bench Depth*	500mm		
Die Spigot Size	3/8"		
Top Spigot Size	3/8"		
Throat Depth	92mm		

The FP1 is capable of setting any eyelets with a hole size when closed up to approx 13.00mm (28 sail or 3 Grommet)

In order to ensure a consistent accurate setting, the RP1 machine incorporates a ratchet mechanism to prevent the foot pedal from being returned to the operator until a full stroke has been completed.

The FP1-rp features a pedal positioned at the back of the machine so it can be operated from the rear. This allows the machine to be positioned against a work bench so that work can be laid out flat on the bench while the eyeleting takes place. We can even supply the machine with its height to suit the height of your bench.

Can also be used to set rivets, pop fasteners and other fasteners when used with the correct dies.
